Windsor, Ontario, CA

I have a valid Work Permit

Summary

Customer-focused and results-driven Customer Service Representative with proven experience delivering exceptional support across phone, email, and live chat channels. Skilled in resolving technical and service-related issues, managing customer accounts through CRM systems, and ensuring high levels of customer satisfaction. Adept at troubleshooting, multitasking, and handling transactions, while upselling relevant services and collaborating with cross-functional teams to enhance support processes. Demonstrates strong communication, verbal communication skills, written communication, and problem-solving abilities with a deep understanding of customer needs and business goals. Proficient in research, conflict resolution, and using secure Ethernet-based systems in fast-paced environments. Committed to maintaining professionalism, accuracy, and efficiency while adhering to company policies, privacy regulations, and delivering timely solutions with LESS supervision.

Education

- Master of Applied Computing at University of Windsor (Jan 2023 – Apr 2024)
- Bachelor of Technology in Computer Science at LBR College of Engineering. (Jul 2015 - Apr 2019)

Work Experience

IO Solutions,

Customer Support Representative / Technical Support

Canada, Ontario

Jun 2023 – Feb 2025

- Delivered high-quality inbound customer support across phone, email, and live chat channels, resolving technical and service-related issues for Rogers Internet, TV, and Mobile products in a fast-paced, high-volume environment.
- Utilized CRM systems to manage and document transactions and customer needs, ensuring timely follow-ups and accurate case handling with strong written and verbal communication skills.
- Provided step-by-step troubleshooting and technical support for Microsoft Windows and related software, improving first-call resolution rates and enhancing problem-solving outcomes.
- Conducted research on recurring issues and identified patterns in customer needs, contributing to service improvements and product optimization.
- Detected patterns in concession abuse and supported conflict resolution and fraud prevention efforts, significantly minimizing financial losses.
- Recommended relevant products and services aligned with customer needs, improving customer satisfaction and retention.
- Collaborated with cross-functional teams to enhance internal workflows and participated in onboarding and mentoring new hires on support best practices.
- Maintained comprehensive knowledge of Rogers offerings, policies, and procedures to deliver accurate information and consistent communication.
- Demonstrated ability to multitask across multiple systems and applications while maintaining professionalism and adherence to data privacy regulations.
- Excelled in managing customer accounts remotely, using secure Ethernet connections and operating independently with LESS supervision while consistently meeting KPIs and quality metrics.

Tata Consultancy Services,

Senior Systems Engineer DevOps Engineer (Release/Configuration Management)

Bengaluru, India

Jun 2019 - Apr 2022

- Built and managed robust CI/CD pipelines using Jenkins, integrating with Subversion and GitHub for version control, and automating deployments across environments (IFTE, FTE, Preprod, Production), enabling rapid deployment of over 100 applications within 10 minutes.
- Designed and deployed containerized applications using Docker and Kubernetes, improving scalability and reliability across cloud environments.
- Skilled in building and deploying ML model inference, ground truth, and monitoring pipelines in production using tools like Azure ML and GCP services.
- Leveraged Infrastructure as Code with Terraform for provisioning scalable infrastructure and used Ansible and Ant scripting for configuration management and log automation.
- Set up Jenkins master/slave architecture and orchestrated complex multi-node deployments. Worked with WebSphere and IBM WebLogic for deploying JAR, WAR, and EAR files, ensuring stability in pre-production releases.

- Demonstrated hands-on expertise in cloud-native platforms, including Azure and GCP, while integrating monitoring tools like Prometheus and Grafana to ensure continuous observability and high availability.
- Collaborated cross-functionally to ensure secure, compliant, and seamless production releases, aligning with enterprise-grade DevOps and MLOps standards.

Skills

- Excellent verbal and written and communication skills, ensuring clarity and understanding with customers.
- Adept at identifying issues and providing timely, effective solutions that meet customer needs.
- Committed to delivering high-quality service and ensuring customer satisfaction.
- Experienced with CRM systems, Microsoft Office Suite, and other customer management software.
- Capable of handling multiple customer inquiries simultaneously while maintaining attention to detail.
- Proven ability to work well in teams and collaborate across departments to resolve customer issues.
- Quick learner, able to adapt to new processes and tools while maintaining focus on customer care.
